**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 09-107**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from June 21 to August 6 2009. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form. This information will also be sent electronically.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From June 21 to August 6, 2009, a total of 195 water samples were analyzed for GeoSyntec Consultants at NASA CHRE, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB1: FDOH NELAP Certification Number E82815

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0

KB Labs, Inc.
6821 SW Archer Road
Gainesville, FL 32608
Phone: 352-367-0073
Fax: 352-367-0073
Email: info@kbmobilelabs.com

ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Sample ID CRHEA-DPT0019-038.0 reported 1,1,dichloroethene 1.0 changed to <1.0ug/L.

3. Changes for sample ID CRHEA-DPT0020-018.0 reported analytes <1.0 changed to <10ug/L.

4. Changes for sample ID CRHE-DPT0033-043.0 reported:
   1,1-dichloroethene 3.6 changed to 18ug/L.
   t-1,2-dichloroethene 14 changed to 72ug/L.
   trichloroethene <1.3 changed to <5.0ug/L.

5. Changes for sample ID CRHE-DPT0034-043.0 all analytes reported <1.0 changed to <2.0ug/L.

6. Changes for sample ID CRHE-DPT0036-038.0 reported:

*KB Labs, Inc.*
*6821 SW Archer Road*
*Gainesville, FL 32608*
*Phone: 352-367-0073*
*Fax: 352-367-0073*
*Email: info@kbmobilelabs.com*

1,1-dichloroethene <45 changed to <100ug/L.
trichloroethene <26 changed to <100ug/L.
tetrachloroethene <18 changed to <100ug/L.

7. Changes for sample ID CRHE-DPT0036-043.0 reported trichloroethene and tetrachloroethene <1.0 changed to <2.0ug/L.

8. Values between KB Labs Reporting Limit (RL) and Method Detection Limit (MDL) are indicated with a “I” Data Qualifier.

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 09-275**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from January 25 to February 2, 2010. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From January 25 to February 3, 2010, a total of 181 water samples were analyzed for GeoSyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Changes for sample ID CRHE-DPT0046-038.0-20100125 reported:
   vinyl chloride <1.0 changed to 10.0ug/L.
   t-1,2-dichlprothene <1.0 changed to 1.8 ug/L.
   c-1,2-dichloroethene <1.0 changed to 6.7 ug/L.

3. Changes for sample ID CRHE-DPT0053-028.0-20100127 reported:
   vinyl chloride <1.0 changed to 90.9ug/L.
   c-1,2-dichloroethene <1.0 changed to 2.3ug/L.

4. Changes for sample ID CRHE-DPT0073-038.0-20100203 reported:
   c-1,2-dichloroethene 1.6 changed to <1.0ug/L.
   trichloroethene <1.0 changed to 1.6ug/L.

5. Sample ID CRHE-DPT0050-038.0-20100126 has an "L" qualifier for vinyl chloride indicating the concentration exceeded Calibration range.

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

6. Sample ID CRHE-DPT0052-028.0-20100127 has an “L” qualifier for vinyl chloride indicating the concentration exceeded Calibration range.

7. Sample ID CRHE-DPT0055-038.0-20100127 has an “L” qualifier for vinyl chloride indicating the concentration exceeded Calibration range.

8. Freon 113 was detected in a couple of samples as a TIC.

| | |
|---|---|
| CRHE-DPT0069-010.0 | 1080 ug/L |
| CRHE-DPT0069-018.0 | 20 ug/ |

9. Compound 1,1-dichlorethane was also detected as a TIC during the project. As per client, values have been reported along with J estimation DQ.

10. During first week of project work, GCMS had some instrumental difficulties maintaining calibration tune. Client was notified. Samples possibly affected for vinyl chloride were reran on 1/28 after instrument tune was fixed.

11. All references to CHRE were changed to CRHE, the correct NASA KSC Site Location ID. Samples on COC are labeled CRHE.

12. Client had site ID’s DPT04XX changed to DPT00XX. Noted on the COCs.

| **Comments:** | Although some surrogates may be out of the control percent recovery range, other supporting QC, such as matrix spikes, matrix spike duplicates, method blanks, and laboratory control samples, are performed by KB Labs to further validate reported data. | | | | | | | | |

***Surrogate Compounds:**
S1 = Dibromofluoromethane (54% - 149%)
S2 = 1,2- Dichloroethane-D4 (61% - 156%)
S3 = Toluene-D8 (72% - 127%)
S4 = 4-Bromofluorobenzene (72% - 125%)

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 10-37**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from February 22 to March 2, 2010. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From February 22 to March 2, 2010, a total of 150 water samples were analyzed for GeoSyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB1: FDOH NELAP Certification Number E82815

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Sample ID CRHE-DPT0089-043.0 reported trichloroethene 5200 changed to 520ug/L.

3. As per client request, all diluted samples with values between the EL and MDL are reported and identified with FDEP Data Qualifier "I".

Pensacola, FL 32534

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 10-137**

Dear Ms.Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from June 14 to 124, 2010. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From June 14 to 24, 2010, a total of 152 water samples were analyzed for GeoSyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB1: FDOH NELAP Certification Number E82815

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Changes for sample ID CRHE-DPT0097-010.0-20100614 reported:
   t-1,2-dichloroethene 28.8 changed to <1.0ug/L.
   c-1,2-dichloroethene <1.0 changed to 28.8ug/L.

3. Sample ID CRHE-DPT100-038.9-20100615 reported c-1, 2-dichloroethene 5900 changed to 59000 ug/L.

4. As per NASA client request for diluted samples between the lab RL and MDL are reported with FDEP Data Qualifier "I" some results were changed from the Field Report to the Final Report to reflect this requirement.

5. As per Geosyntec, the VC and TCE reporting limit on diluted samples with non-detects were lowered to KB Labs MDL and reported with FDEP Data Qualifier "I".

Jill Johnson
GeoSyntec Consultants
9511 Holsberry Lane, Suite A
Pensacola, FL 32534

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 10-169**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from August 2 to 12, 2010. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From August 2 to 12, 2010, a total of 180 water samples were analyzed for GeoSyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Sample ID CRHE-DPT0117-048.0-20100802 reported vinyl chloride <1.0 changed to 4.7ug/L.

3. Sample IDCRHE-DPT0126-018.0-20100805 reported c-1, 2-dichloroethene <1.0 changed to 2.1ug/L.

4. Sample ID CRHE-IDW178747-20100806 has an "L" qualifier for c-1, 2-dichloroethene indicating the concentration exceeded Calibration range.

5. Sample ID CRHE-DPT0135-038.0-20100810 has an "L" qualifier for vinyl chloride indicating the Concentration exceeded Calibration range.

6. Changes for sample ID CRHE-DPT0134-043.0-20100810 reported: vinyl chloride 790 changed to 200ug/L.

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

t-1,2-dichloroethene 38 I changed to 43 I.
c-1,2-dichloroethene 2800 changed to 1500ug/L.
trichloroethene 50 changed to 1500ug/L.

7. Sample ID CRHE-DPT0136-043.0-20100810 reported c-1, 2-dichloroethene 1.8 changed to <1.0ug/L.

8. Sample ID CRHE-DPT0136-043.0-20100810 should be CRHE-DPT0136-048.0-20100810.

9. As per NASA Client request for diluted samples between the lab RL and MDL are reported with FDEP Data Qualifier “I” some results were changed from the field Report to the Final Report to reflect this requirement.

10. Because the presence of high level freon compounds and to prevent damage to the analytical instrument, several samples were diluted without any target compounds being identified:

    CRHE-DPT116-018.0-20100802
    CRHE-DPT116-028.0-20100802
    CRHE-DPT116-033.0-20100802
    CRHE-DPT117-038.0-20100802

| **Comments:** | Although some surrogates may be out of the control percent recovery range, other supporting QC, such as matrix spikes, matrix spike duplicates, method blanks, and laboratory control samples, are performed by KB Labs to further validate reported data. 1,2-DCAD4 surrogate recovery drifted high during the day but would return to acceptable criteria for initial and daily CCS. Results were not affected as LCS and MS/MSD recoveries were in control even when 12DCAD4 recoveries were high. | | | | | | | | |

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 10-184**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from October 11 to 14, and 18, 2010. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From October 11 to 14, and 18, 2010, a total of 107 water samples were analyzed for GeoSyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0

ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Changes for sample ID CRHE-DPT0145-043.0-20101012 reported:
   t-1,2-dichloroethene <1.0 changed to 1.6ug/L.
   c-1,2-dichloroethene 1.6 changed to <1.0ug/L.

3. As per NASA client request for diluted samples between the lab RL and MDL are reported with FDEP Data qualifier "I". Some results were changed from the Field Report to the Final Report to reflect this requirement.

| **Comments:** | Although some surrogates may be out of the control percent recovery range, other supporting QC, such as matrix spikes, matrix spike duplicates, method blanks, and laboratory control samples, are performed by KB Labs to further validate reported data. | | | | | | | | |

***Surrogate Compounds:**
S1 = Dibromofluoromethane (84% - 121%)
S2 = 1,2- Dichloroethane-D4 (69% - 133%)
S3 = Toluene-D8 (87% - 111%)
S4 = 4-Bromofluorobenzene (76% - 125%)

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 11-173**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from October 19 to 21, 2011. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 472-5830.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From October 19 to 21, 2011, a total of 58 water samples were analyzed for GeoSyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, freon 113, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB1: FDOH NELAP Certification Number E82815

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example,

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. As per NASA Client request for diluted samples between the lab RL and MDL are reported with FDEP Data Qualifier "I". Some results were changed from the Field Report to the Final Report to reflect this requirement.

## KB LABS, INC.

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project #11-173**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from January 9 to 12, 2012. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 472-5830.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From January 9 to 12, 2012, a total of 71 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB2: FDOH NELAP Certification Number E82840
KB Mobile Labs Unit KB1: FDOH NELAP Certification Number E82815

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the

KB Labs, Inc.

Email: info@kbmobilelabs.com

standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. As per NASA client request for diluted samples between the lab RL and MDL are reported with FDEP Data qualifier "I".

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project #12-28**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from February 7 to 10, 2012. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 472-5830.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From February 7 to 10, 2012, a total of 53 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB2: FDOH NELAP Certification Number E82840

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example,

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. As per NASA client request for diluted samples between the lab RL and MDL are reported with FDEP Data qualifier "I".

**RE: NASA CRHE, KSC, FL - Final Data Report RevA**
**KB Labs Project # 12-163**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 472-5830.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From October 2 through 16, 2012, a total of 71 water samples were analyzed for Geosyntec Consultants at Wilson Corners, KSC, FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example,

KB Labs, Inc.
25132 SW 1st Ave
Newberry, FL 32669
Phone: 352-472-5830
Fax: 352-472-5832
Email: info@kbmobilelabs.com

if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. As per client, removed the V* designation for samples collected on 10/16/12.

3. As per client request, changed DPT0195-058.0-20121016 to DPT0089-058.0-2012016.

4. As per client request, removed original reported sample of DPT0089-058.0-20121016 from report (duplicate location).

New Age/Landmark, Inc.
*Mobile Laboratory Services*

April 23, 2013

**Geosyntec Consultants**
316 South Baylen Street, Suite 201
Pensacola, FL 32502
ATTN: Ms. Jill Johnson

SUBJECT: NARRATIVE FOR PROJECT NAL13-041, NASA, Kennedy Space Center.

Dear Ms. Johnson,

Enclosed is the final report containing the analytical results for the mobile laboratory services provided for Geosyntec Consultants, Kennedy Space Center site, Florida. The report consists of 587 pages inclusive of all sample results, QC analyses, chains of custody, and this cover letter.

New Age/Landmark, Inc. certifies that to our best knowledge this data package is in compliance with the terms and conditions of the contract, both technically and for completeness and that test results meet all requirements of New Age/Landmark's Quality Assurance Manual. Release of the data has been authorized by the laboratory's president or his designee.

Volatile analysis of samples was performed utilizing USEPA Method 8260B on a Purge and Trap system coupled with a Hewlett Packard 5890 GC/MS. All water samples are reported in µg/L (ppb). Reporting limits reflect any sample dilutions that may have been performed.

Please review the report and contact our office if you have any questions or need additional information. Thank you for choosing New Age/Landmark, Inc. for this important project. We look forward to working with you again in the future.

Sincerely,
New Age/Landmark, Inc.

Scott D. Wall
President

Maria C. Paraschivescu
QA/QC Officer

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.
